

In Mathematics, bands have been devised to build up mastery of key skills. The progression grid shows how themes are developed throughout Key Stage 3 and links common topics together.

Students are assessed using Skill Set Tests throughout KS3 and are awarded a band based on their results. An award of a band is a 'best fit' and does not mean that students are unable to answer some questions from higher Skill Sets, it simply means that they have not demonstrated mastery of all the skills required to be awarded the higher band.
